
Apex Payment Solutions Launches Apex Integrated for Open Dental

Authorized direct integration connects payment collection and posting to simplify daily workflows for dental practices

October 1, 2026 - Apex Payment Solutions announces the launch of Apex Integrated, an authorized, direct integration with Open Dental designed to simplify payment collection, reduce manual entry and help dental practices maintain accurate patient records.

Apex Integrated brings payment collection, allocation and automatic posting into one Open Dental workflow. By connecting payments to the patient ledger, the integration helps teams spend less time entering transactions and correcting posting mistakes while giving patients more convenient ways to pay.

Key features include:

- **Automatic posting:** Post payments directly to Open Dental to reduce duplicate entry.
- **Flexible payment allocation:** Allocate payments to procedures, providers or family members.
- **Text to Pay:** Send patients a secure payment link for a convenient way to pay remotely.
- **Recurring payments:** Support scheduled payments and patient payment plans.
- **Refund and void write-back:** Keep Open Dental records aligned when transactions are refunded or voided.

"As a practicing dentist, I understand how much time payment collection and posting can take from an already busy team," said Dr. Zak Allmand, Co-Founder and Chief Operating Officer of Apex Payment Solutions. "Apex Integrated helps simplify that work by connecting payments directly to Open Dental, giving practices more time to focus on their patients."

Dental practices can learn more about Apex Integrated or request a demo at <https://apexpaymentsolutions.com/apex-integrated/open-dental> or by calling (800) 270-7164.

About Apex Payment Solutions

Apex Payment Solutions provides payment processing technology and transparent pricing options for healthcare practices.
